EXPERIENCE

Western Railway

Software Engineer Intern

Mumbai, India

May 2025 – Jun 2025

- Architected a backend automation system on **Flask** adopted by **50+ railway staff**, eliminating redundant manual processes across 3 departments.
- Engineered scalable **RESTful APIs** with **JWT** authentication and role-based middleware; integrated **Celery** task queues backed by **Redis** for asynchronous job processing.
- Designed and managed **100K+ records** in **MySQL** with optimized indexing, improving query and processing speed by **30%**.
- Reduced manual paperwork by **40%** through end-to-end backend automation; validated all APIs using structured **Postman** test suites.

Nashabandi Mandal NGO

Web Development Intern

Mumbai, India

Aug 2024 – Nov 2024

- Built and deployed a production website for an NGO, improving user engagement by **25%** through better UX and mobile-first design; owned hosting, domain, and DNS.

PROJECTS

Synthetica.in | *Flask, DistilBERT, TF-IDF, Firebase* | Live · GitHub

Jan 2024 – Present

- Co-founded an AI-content detection platform serving **300+ users**; designed the backend architecture and inference pipeline achieving **85%+** accuracy.
- Built **Flask** REST APIs for model inference and user workflows; engineered an ensemble ML pipeline using **TF-IDF**, **Logistic Regression**, and **DistilBERT**.
- Implemented **Firebase**-backed authentication with session management and role-based access control.

Azure Fee Management System | *Python, Azure Functions, Azure SQL, Azure AD B2C, Blob Storage* | GitHub

Jun 2026 – Jul 2026

- Developed a serverless fee management system using **Azure Functions** and **Azure SQL**, enabling secure student fee retrieval, payment tracking, and receipt generation.
- Implemented **Azure AD B2C** authentication with role-based access for students and administrators, exposing REST APIs through Azure Function endpoints.
- Integrated **Azure Blob Storage** for receipt storage and built SQL stored procedures to optimize fee calculations, payment updates, and reporting workflows.

Forecast Flow | *Python, Azure, Databricks, Random Forest* | GitHub

Aug 2024 – Oct 2024

- Built a REST API backend to serve time-series forecasting data with automated preprocessing and feature-engineering pipelines.
- Integrated **Random Forest** into a scalable prediction service; deployed distributed workflows on **Azure** and **Databricks**.

SFIT-STOCKS | *Node.js, Express.js, MongoDB, JWT* | GitHub

Nov 2024 – Feb 2025

- Built a production-grade inventory management backend with **Node.js/Express.js** and **JWT**-based **RBAC**, actively used by college staff across multiple departments.

TECHNICAL SKILLS

Backend & Frameworks: Flask, Django, Node.js, Express.js, RESTful APIs, Microservices

Databases: SQL, MySQL, PostgreSQL, MongoDB, Redis, Firebase Firestore

Cloud & DevOps: Azure, Databricks, Docker, CI/CD, Nginx, Linux

Auth & Testing: JWT, OAuth2, RBAC, Postman, Unit Testing

Languages: Python, Java, JavaScript

EDUCATION

St. Francis Institute of Technology

Bachelor of Engineering in Computer Engineering

Mumbai, India

Aug 2022 – May 2026

ACHIEVEMENTS & LEADERSHIP

Technical Leadership & Recognition

- **1st Prize** at Prkalp SFIT Project Competition — won in **2 consecutive years**.
- Tech Team Lead at Student Council and CSI; led technical infrastructure for multiple college-wide events.
- Conducted an **LLM** workshop for **150+ participants** covering prompt engineering, RAG, and fine-tuning.
- Participated in **8+ hackathons**; independently built and deployed **10+ production websites** for clients.
