Portfolio

Summary

Data Analyst skilled in transforming raw data into actionable business insights using SQL, Power BI, and Python. Experienced in building scalable data pipelines, forecasting models, and KPI dashboards to support strategic decision-making. Strong focus on business impact, trend identification, and performance optimization in data-driven environments.

Education

St Francis Institute of Technology

Bachelor of Engineering in Computer Science

Grade: 9.03 C.G.P.A.

Mumbai, India

2022 – 2026

Technical Skills

- **Data Analysis:** Exploratory Data Analysis (EDA), data cleaning, trend analysis (Excel, Python)
- **Data Visualization:** Interactive dashboards, KPI tracking, business storytelling (Power BI)
- **SQL:** Joins, aggregations, filtering, query optimization (MySQL, SQLite)
- **Python:** Pandas, NumPy, Matplotlib for data processing and analysis
- **Machine Learning:** Regression, Random Forest, forecasting, feature engineering, model evaluation
- **Data Engineering:** ETL pipelines, Azure Databricks (Bronze–Silver–Gold architecture)

Experience

Bassein Catholic Co-operative Bank

Software Intern

June 2025 – July 2025

- Provided Level 1 application support, assisting users with form filling, data entry, and resolving website-related queries.
- Resolved troubleshooting issues related to application access and validation errors to ensure smooth user experience.
- Used SQL queries to retrieve, analyze, and validate data for resolving user-reported issues and supporting data accuracy.

Projects

Retail Demand Forecasting (ForecastFlow) | Azure, Databricks, ETL, Power BI

February 2026

- Built a retail demand forecasting system using Azure and Databricks with a structured Bronze–Silver–Gold data pipeline.
- Processed and transformed datasets through ETL pipelines to maintain production-level data quality and scalability.
- Developed Random Forest-based predictive models to forecast retail demand for the next 7 days and visualized business insights using Power BI dashboards.

FMCG Sales & Customer Insights Analysis | SQL (SQLite), Power BI, Excel

March 2026

- Analyzed FMCG sales data to identify trends in revenue, product performance, and customer behavior across regions.
- Built an interactive Power BI dashboard to track key KPIs such as total sales, regional performance, and top products.
- Performed SQL-based analysis in SQLite to identify high-revenue categories and actionable business insights.
- Generated data-driven recommendations to improve sales performance and optimize regional and product strategies.

Extracurricular

E-cell SFIT | President

July 2024

- Led execution of 10+ innovation events and coordinated cross-functional teams.

TEDxSFIT | Administrator

January 2025

- Managed operations for a 50+ member team and coordinated large-scale event logistics.

Certifications

- Data Analytics, Data Science and Machine Learning – Udemy
- Power BI for Beginners – Simplilearn
- ISO 27001 Lead Implementer – Udemy
