EDUCATION

St. Francis Institute of Technology

Bachelor of Engineering in Computer Engineering

– GPA: 7.0 / 10

Mumbai, India

Aug 2022 – May 2026

EXPERIENCE

Western Railway

Software Engineer Intern

Mumbai, India

May 2025 – Jun 2025

- Architected and deployed a full-stack workflow automation system adopted by **50+ railway staff**, eliminating redundant manual processes across 3 departments.
- Engineered scalable RESTful APIs using **Flask** with **JWT** authentication and role-based middleware to handle concurrent staff requests securely.
- Built a responsive **React.js** frontend; managed **100K+ records** in **MySQL** with optimized indexing, improving processing speed by **30%**.
- Reduced manual paperwork by **40%** through end-to-end automation; validated all APIs using structured **Postman** test suites.

Nashabandi Mandal NGO

Web Development Intern

Mumbai, India

May 2024 – Nov 2024

- Developed and deployed a responsive **React.js** website, increasing user engagement by **25%** through improved UI/UX and mobile-first design.
- Optimized frontend performance via lazy loading, code splitting, and asset compression, reducing page load time by **35%**.
- Managed end-to-end production deployment including hosting setup, domain configuration, and DNS management.

PROJECTS

Forecast Flow | Python, Azure, Databricks, Random Forest | GitHub

Aug 2024 – Oct 2024

- Built REST API backend to serve time-series forecasting data with automated preprocessing and feature engineering pipelines.
- Integrated **Random Forest** into a scalable prediction service; deployed workflows on **Azure** and **Databricks** for distributed large-scale data processing.

Synthetica.in | Flask, DistilBERT, TF-IDF, Firebase | synthetica-3bf2d.web.app | GitHub

Jan 2024 – Present

- Co-founded an AI-content detection platform serving **300+ users** with **85%+** accuracy across multiple content types.
- Designed REST APIs in **Flask** for inference and user workflows; built ensemble ML pipeline using **TF-IDF**, **Logistic Regression**, and **DistilBERT**.
- Implemented **Firebase** authentication with session management and role-based access control for admin and end-user flows.

SFIT-STOCKS | Node.js, Express.js, MongoDB, JWT | GitHub

Nov 2024 – Feb 2025

- Built a production-grade inventory management system actively used by college staff across multiple departments.
- Designed RESTful APIs using **Node.js** and **Express.js** for full CRUD operations; modeled data in **MongoDB** with optimized schema for efficient querying.
- Implemented **JWT**-based authentication and **RBAC** to enforce secure multi-role system access.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Frameworks: Flask, React.js, Django, Node.js, Express.js

Databases: MySQL, MongoDB, Firebase Firestore, REST API

Cloud & DevOps: Azure, Databricks, Docker

ACHIEVEMENTS & LEADERSHIP

Technical Leadership & Recognition

- **1st Prize** at Prakash SFIT Project Competition — won in **2 consecutive years**.
- Tech Team Lead at Student Council and CSI; planned and executed technical infrastructure for multiple college-wide events.
- Conducted a hands-on workshop on **Large Language Models (LLMs)** for **150+ participants**, covering prompt engineering, RAG and fine-tuning basics.
- Participated in **8+ hackathons**; independently developed and deployed **10+ production websites** for external clients.
